

## Create Accurate Financial Reports, Maximize Tax Benefits, and Meet Compliance Requirements

Maintain complete visibility of your fixed assets and depreciation calculations. Fixed Asset Management maintains depreciation schedules for assets that you own, rent, or lease, and it is fully integrated with all other financial modules. You can add fixed assets directly from AP purchases, import them, or add them individually. Manage fixed assets under construction. Track tax and reporting scenarios independent of general ledger postings.

### KEY FEATURES OF FIXED ASSET MANAGEMENT

- **Multiple depreciation methods.** Choose from a large inventory of predefined depreciation schedules or create your own. Accommodate accelerated cost recovery system (ACRS), modified ACRS, straight-line, declining-balance, sum of years' digits, remaining value, flat rate, and other methods. Each depreciation method can include different averaging conventions as well as useful life and recovery periods.
- **Tax benefit support.** Take advantage of multiple depreciation books, multiple calendars, special depreciation bonuses, and tax benefit recapture capabilities to comply with complex tax rules.
- **Purchase order integration.** Convert purchases into fixed assets without re-entering data. Eligible purchases are automatically displayed to simplify the conversion process

### KEY BENEFITS

#### MANAGE THE ENTIRE ASSET LIFECYCLE

- Account for assets from the time they are acquired until disposal
- Enter asset information only once since assets are shared by all modules and reports

#### CUSTOMIZE FOR YOUR COMPLIANCE NEEDS

- Configure depreciation schedules with a predefined method, averaging convention, useful economic life, and recovery period
- Create your own schedule if needed

#### SAVE TIME WITH AUTOMATION

- Automate entry, depreciation schedules, and workflow
- Keep accumulated depreciation, asset values, and asset class balance reports up to date

#### MAKE FASTER DECISIONS

- Get instant access to past information through reports and dashboards
- Gain insights into future needs to improve business decisions
- Use included reports or design your own

Get started quickly by converting purchases into fixed assets using predefined depreciation schedules

## FIXED ASSET MANAGEMENT FEATURES AND CAPABILITIES

<b>Multiple Depreciation Books</b>	Create multiple depreciation books for tax and reporting purposes without updating the general ledger. Assign tax and reporting fiscal years that are independent of your actual financial ledger.
<b>Multiple Asset Types</b>	Manage multiple property types, including owned property, leases, rentals, and granted property. Track assets that are leased or rented to others.
<b>Multiple Averaging Options</b>	Select from different averaging methods such as full period, mid-period, next period, modified half period, full quarter, full year, and full day.
<b>Fixed Asset Tools</b>	Make mass changes to several fixed assets with one entry. Tools include depreciation schedule processing, releasing fixed asset transactions, converting purchases to fixed assets, and generating fixed asset calendars.
<b>Fixed Asset Classes</b>	Create fixed asset classes to group assets. Simplify entry of commonly used schedules.
<b>Fixed Asset Reporting</b>	Manage asset acquisitions, disposals, asset balances, asset net values, future projections, and depreciation transactions through built-in reports. Drill down to view transaction details.
<b>Fixed Assets Under Construction</b>	These assets are built from multiple components. They do not require depreciation schedules and do not have a placed-in-service date. Costs are accumulated in a dedicated fixed asset under construction asset account until transferred to the fixed asset account when the asset is completed. Examples include the construction of production assembly lines, HVAC systems with multiple components, and retrofitting a service vehicle with additional equipment.
<b>U.S. Tax Bonuses</b>	Support calculations required under IRS Section 179 for reduced first-year depreciable basis. Process reversals after early asset disposal.
